

Authority in the Modern State

Originally published: New Haven: Yale University Press, 1919. x, 398 pp. Laski intended this work to be a sequel to *Studies in the Problem of Sovereignty* (1917). He argues that sovereignty is best understood as a type of authority, and he supports his case with examples drawn principally from modern French history. After tracing the origins of his subject, Laski considers the significance of Bonald, Lamennais, Royer-Collard and the Syndicalist movement. Laski was a professor at Harvard at the time of publication.
