

Decisions on the Law of Patents for Inventions Rendered by [English Courts, and By] the United States Supreme Court (Volume 11)

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889. Excerpt: ... Opinion of the court instituted the present suit in the court below. Pending the suit, the other complainant departed this life; and Margaret Meyers, his sole executrix, was duly admitted in his stead to prosecute the suit as co-complainant with the assignee of the other half interest in the extended patent. Infringement is charged, and that the respondents have made large gains and profits by the unlawful use of the patented invention; and the complainants pray for an account and for an injunction. Process having been issued and service made, the respondents appeared and filed an answer, in which they set up in substance and effect the following defenses: (1) That the invention is of no utility or value. (2) That the patentees are not the original and first inventors of the alleged improvement. (3) That the alleged improvement was well known and had been in public use long prior to the supposed invention by the patentees. (4) That knowledge of such prior public use was possessed by the several persons whose names and places of residence are set forth in the answer. (5) That the patented improvement, years before the application for the patent was executed, was fully described in the respective printed publications mentioned in the answer filed by the respondents. Minute and accurate description of the patented machine is given in the drawings, and the specification divides the invention into four separate features, as follows: (1) That it consists in the employment or use of deflecting plates--one or two--placed at the sides of a circular saw, for the purpose of enlarging or expanding the saw kerf to prevent the sawed stuff from coming in contact with the sides of the saw and

binding the edge of the same near the teeth.
Deflecting plates of the kind also...
