

Digital Divide: Poems

This collection of semi-autobiographical poems reflect how we exist with technology, emphasizing our social media participation. How do we handle the blurry (and blurring) line between our on-line and off-line selves? Are we better off with or without this technology? Digital Divide includes both serious and humorous thoughts, giving us reasons to pause over how we co-exist with social media, technology, and each other. Featuring over twenty poems, Ms. Tran work helps us to question our online and offline lives, ultimately suggesting - that for all the good and bad - the most important thing about technology is how it brings us together.
