

## Zones

Jenny Kane loves weird science - but its gone way, WAY out of control. Her mothers moved out, her dads still moping around, and shes not sure how to cope any longer. And she keeps getting these weird phone calls from a scientist named Rod whos...where?...when? - another time zone? Another time altogether? Another reality? But thatd be crazy, wouldnt it? She also has the strangest feeling that shes done all this before. Whos this odd boy she just crashed into - this Tristan? How does she even know his name - or the fact that he can perform parlor-type magic tricks? Hilarious, exciting, touching, Zones is a classic adventure of time travel: a great SF adventure that grabs you with its opening lines - and then never lets you go!
