

Geometric Puzzles to scratch your brain (Logic Games for Kids)

How many squares? Circles? Triangles? Okay, so you count the little triangles and arrive at an answer. Nope, that's not it. You scratch your noggin and wonder what is going on inside there, in your craniums brainium. Hmmm. You count again and get the same answer. Try again. You are about to give up when you notice that the smaller triangles can be combined to form bigger triangles. What? Oh, now you get it. Inside this incredible book you will find 100 problems. Some are easy, others...not so much. Grab a pencil, open this book, and give your brain the scratching that it has been begging for.
