

## Java(TM) Programming Language, The (3rd Edition) (The Java Series)

The Java™ Programming Language, Third Edition gives every Java developer an up-to-date, authoritative view of the language as its creators intended it. Co-authored by James Gosling, Java's inventor, the book is as authoritative as ever, and even more comprehensive -- with in-depth coverage of the latest Java 2 Standard Edition Version 1.3 features and classes. As with previous editions, this book starts with a concise introduction to the language; presents detailed descriptions of Java's commands, constructs, and libraries; and delivers progressively advanced coverage of classes and objects, interfaces, exception-handling, threads and multitasking, packages, I/O, and more. Best of all, it offers a creator's eye view of the rationale behind Java's design, and its latest enhancements -- all designed to help developers make the most of Java's power, portability, and flexibility.
