

The Northern Dream

Generations in search of the American dream despite facing many obstacles on their journey. The first exodus begins in the Spring of 1920, when Odessa and Henry aren't sure how far and how long they would be on the run. They only know they have to leave Charleston, South Carolina, on a journey that revolves around deprivation, segregation and determination, along with broken pieces and broken promises. Then, William and Sophia, the next generation, attempts to carry on the dream, which now revolves around what the American people are considering fantasy and flamboyance in the northern states, which is eluding millions of American people, primarily in the southern rural areas to migrate up north. Finally, the third generation begins with Sophia and William in 1942, where they're now residing in Philadelphia, another decade (1960), which is surrounded by primarily socioeconomic and political transformations and rapid growth of northern manufacturing and industrial production on its way.
