

Sugurulines, a very challenging puzzle

Sugurulines is a new (May 2016) challenging puzzle based on Suguru puzzles. Instead of finding numbers like Sudoku, you now have to look for lines. The rules are very simple. You need to draw lines to group numbers in the grid. There are five types of groups containing 1 to 5 numbers: (1), (1-2), (1-2-3), (1-2-3-4) and (1-2-3-4-5). The groups can take all kinds of shapes. What is special about this puzzle eBook. You don't need to copy the puzzles to solve them. We will guide you through each puzzle step by step. We will mark the square where you can place a number or a line. The next place will show you the solution and a new square will be marked to find the next number or line and so on... This eBook contains two types of puzzles: Suguru puzzles and Sugurulines puzzles. We wish you lots of fun with our Suguru and Sugurulines puzzles!
