

GameWize Making K-2 Learning Fun! With Microsoft Office

Use Microsoft Excel and PowerPoint to spice up lessons! Bring even the most hesitant learner out of their lazy daze. Invigorate your classroom with a learning-based, competitive enthusiasm that will have students begging to play (and learn) some more. Tailor each game to meet the needs of your unique classroom environment. Play as a whole class activity, or set up stations in the classroom for partner or small group competitions. Modify game components to make it relevant to current topics of study, and create a memorable learning experience for yourself and your students. Grades K-2 Not just another review! Students resist reviews. They have learned it all once. Why should they bother going through it again? With these fun competitive games, students want to master skills in order to surge ahead of the competition to win. Don't have the time? With these pre-prepared game templates, teachers just start the program, open the file, ask a question, get an answer, and the game begins. No above and beyond time-gobbling preparation needed for many of the games included. Features and benefits: Macintosh or Windows, Prepared templates, Detailed click-by-click Excel and PowerPoint instructions. Written by a secondary mathematics teacher/instructional technology coordinator.
