

The Persistence of History: Cinema, Television and the Modern Event (AFI Film Readers)

The Persistence of History examines how the moving image has completely altered traditional modes of historical thought and representation. Exploring a range of film and video texts, from The Ten Commandments to the Rodney King video, from the projected work of documentarian Errol Morris to Oliver Stones JFK and Spielbergs Schindlers List, the volume questions the appropriate forms of media for making the incoherence and fragmentation of contemporary history intelligible.
