

In The Space Of A Song: The Uses of Song in Film

Songs take up space and time in films. Richard Dyer's *In the Space of a Song* takes off from this perception, arguing that the way songs take up space indicates a great deal about the songs themselves, the nature of the feelings they present, and who is allowed to present feelings how, when and where. *In the Space of a Song* explores this perception through a range of examples, from classic MGM musicals to blaxploitation cinema, with the career of Lena Horne providing a turning point in the cultural dynamics of the feeling. Chapters include: The perfection of *Meet Me in St. Louis* *A Star Is Born* and the construction of authenticity *I seem to find the happiness I seek: Heterosexuality and dance in the musical* *The space of happiness in the musical* *Singing prettily: Lena Horne in Hollywood Is Car Wash a musical?* *Music and presence in blaxploitation cinema* *In the Space of a Song* is ideal for both scholars and students of film studies.
