

The Turkish Mafia

The Turkish Mafia dominates the world heroin trade. For fifty years, it has processed raw opiates in clandestine labs and trafficked to the lucrative markets of Western Europe and the United States. Customs officers estimate that it supplies 80 per cent of the smack that reaches Britain. Yet it has remained the most mysterious of global crime cartels. In this landmark book, two eminent criminologists lift the lid on the extraordinary story of the babas, or godfathers, tracing their origins from the so-called urban knights of Istanbul. They reveal details of the historic conclave in 1980, when the babas carved up Europe between them, and spotlight drug barons like the notorious Huseyin Baybasin, the Pablo Escobar of Europe. And they explore the murky world of the right-wing Grey Wolf death squads, the Kurdish PKK, and the Deep State, a shadowy conspiracy between politicians, the military and the leading crime clans. The Turkish Mafia is the last great untold story of international organised crime and the ruthless men who run it.
