Statement of the case. foot, D, so contrived, as shown, that when the device rests upon the tripod formed by the wheels and the foot the standard will assume an upright vertical position, to serve as a suitable fountain-standard, and for this purpose the standard A is provided with a nozzle-holding contrivance applied to the upper end thereof, and consisting of a pair of shell-shaped halves, E E, which are secured to the standard by a thumb-screw bolt, e, through the flattened overlapping lower ends of the scrolls or shells serving to hold the contrivance in place; also, to afford a hinge upon which the halves may be opened; also, as a pivot upon which the thing as a whole may be set at various angles, and also as a means of locking the shells upon the nozzle to hold it in the required position. Upon the standard A, at a suitable height from the ground, is a collar, F, fitted to turn loosely upon the standard. To this collar is affixed or made fast therewith the reel-spindle G, upon which is placed the hose-reel H, provided for this purpose with hollow hubs, h h.
